

In the drawings:

The drawings have been amended as required by the Examiner to show all claimed features. The specification has also been amended, as shown above, to include the newly added reference numerals.

In Fig. 2, the reference numeral - 31- is added to designate the, "gasket seal," mentioned on page 11, line 7.

In Fig. 3, the reference numeral - 43- is added to designate the, "protrusion or tab 43," mentioned on page 12, line 4.

In Fig. 4, the reference numeral - 57- is added to designate the, "detent 57," mentioned on page 12, line 3.

In Fig. 5, the reference numeral - 64- is added to designate the, "spacer pipe 64," mentioned on page 12, line 17.

Remarks

Claims 1, 8 and 23-25 have been canceled. Claims 2-7 and 9-22 remain in the application.

The Examiner has objected to the drawings as failing to show each and every claimed component. The drawings and the specification have been amended to comply with the Rule. Certain reference numerals have been added to the drawings to indicate elements of the original drawings that were not specifically referred to in the specification by number. With regard to the requirement that the, "alignment means," must be shown, the circumferential protrusions and detents that are now referenced by number serve this function. The reference numeral "44," shown on the drawings, has now been incorporated into the specification.

The drawing corrections are shown as appendixes hereto. Upon Examiner's approval, formal drawings will be submitted.

Claims 2-7 and 9-22 stand rejected as indefinite for failing to particularly point out and distinctly claim the invention as required by 35 USC 112, second paragraph. Each of the claims mentioned by the Examiner has been amended as suggested by the Examiner. Therefore, all the claims in the application are now allowable.
